Education

Indian Institute of Information Technology, Jabalpur

August 2024 – Present

B.Tech in Electronics and Communication Engineering (ECE) CPI: 8.1

Relevant Coursework: Computer Networks, Operating Systems (OS), Database Management Systems (DBMS), Data Structures and Algorithms (DSA), Analysis of Algorithms, Probability and Random Processes, Internet of Things (IoT).

Technical Skills

Programming Languages: C, C++, Python, Java, JavaScript, HTML5, CSS3, SQL

Core CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), System Architecture, Scalability, Rapid prototyping

Frameworks & Technologies: React.js, Node.js, Express.js, TailwindCSS, MERN Stack, Vite, Docker, Git, GitHub Actions, WebSockets, WebRTC, MongoDB

Projects

Synthora AI | AI-Powered SaaS Platform

🐙 [Github](#) Aug 2025

React 19, Node.js, OpenRouter API, MongoDB, Razorpay

- Engineered an AI-powered SaaS platform leveraging text prompts and vision-to-code models to dynamically generate production-ready React components, featuring an in-browser sandbox for real-time live-editing with **< 50ms compile latency**.
- Published a custom **Node.js CLI utility** to the NPM registry, empowering developers to seamlessly inject generated UI assets directly into local workspaces, reducing developer scaffolding time significantly.
- Architected a full-stack **MERN infrastructure** with stateless **JWT authentication** and integrated **Razorpay webhooks**, seamlessly managing a tiered credit-based monetization system for enterprise subscription access at scale.

CONVERSA AI | Voice AI Fleet Management Platform

🐙 [Github](#) | [Live](#)

Node.js, React 19, Docker, Web Speech API, MongoDB Jun 2025

- Architected a scalable micro-frontend system utilizing custom **Vite ES module bundling**, achieving **O(1)** widget injection complexity via a single script tag and guaranteeing **100% CSS isolation** across **50+ unique host DOMs**.
- Integrated the **Web Speech API** with an optimized **intent-parsing engine**, reducing voice-to-text latency to **sub-150ms** and utilizing strict hash-map routing to autonomously navigate users with **95% contextual accuracy**.
- Engineered a 3-stage concurrent CI/CD pipeline using **GitHub Actions** and **Docker**, slashing container build times by **40%** to optimize deployment scalability and executing zero-downtime deployment hooks for **99.9% backend availability**.

NEXTROUND AI | Enterprise B2B Mock Interview OS

🐙 [Github](#) | [Live](#)

MERN Stack, OpenRouter API, Monaco Editor, face-api.js, TailwindCSS Apr 2025

- Built a FAANG-tier mock interview environment integrating **OpenRouter/GPT-4o-mini** for dynamic AI voice interactions alongside a live **Monaco Editor** for evaluating code structures and **O(n)** Big-O complexities in real time.
- Developed a Strict Mode enterprise proctoring engine utilizing **face-api.js** for continuous emotional/posture telemetry, combined with tab-switch tracking and IDE copy/paste prevention to guarantee **100% assessment integrity**.
- Implemented automated backend pipelines processing real-time audio transcriptions and custom **AST code parsers**, generating comprehensive PDF performance reports and monetizing access via **Razorpay** subscription tiers.

Competitive Programming & DSA

Algorithmic Problem Solving

[LeetCode](#) | [Codeforces](#) | [GeeksforGeeks](#)

- Achieved a peak **LeetCode rating of 1613**, placing in the top competitive bracket; successfully solved **300+ complex algorithmic problems** across LeetCode, Codeforces, and GeeksforGeeks.
- Demonstrated mastery implementing optimized solutions for tree traversals, dynamic programming, graph algorithms, and advanced array manipulation under time-constrained competitive conditions.

Achievements & Leadership

Gold Medalist – Basketball, Inter-IIIT Sports Meet 2025

- Won **1st place** among **16+ collegiate teams** in a high-stakes national-level tournament, demonstrating decisive leadership, high-performance execution under pressure, and strategic team coordination.

Co-Coordinator – IIIT Jabalpur Basketball Club

- Managed end-to-end operations for **7+ inter-collegiate and intra-collegiate events**, demonstrating strong organizational and resource management skills.
- Led and mentored a team of **15+ student volunteers** to ensure the seamless execution of large-scale sports tournaments and daily club operations.

1st Runner-Up – E-Summit, IIT Roorkee (MTP)

- Led a multidisciplinary team to pitch technical architecture and innovative business solutions before a panel of industry experts, showcasing strong **entrepreneurial problem-solving** under pressure.
